## *A Big Thanks To All*

Welcome to 2008. We hope you had a happy Christmas and New Year.

We would like to take this opportunity to thank all our customers and suppliers for their continuing support. It has been great and we look forward to more of the same.

Last year we saw us increase our staff numbers to meet the demand and expectations of our customers. It was also a good year for results involving our trainees and people up skilling to meet future demands.

This year will also see us recruit more trainees with the help of ESITO (The Electrical Supply Industry Training Organisation) in the areas of Line Work and Electricians.

Once again thank you for support and have a safe and happy New Year.

Simon Topp Managing Director

### Free to Air Satellite TV Topfield Digital Satellite Receiver

Powertech is now supplying Digital TV receivers. With the creation of Freeview TV in New Zealand via satellite, it is now possible to watch TV One, Two, Three, as well as additional TVNZ channels, C4 and Maori TV. Due to the signals being transmitted via the Optus D1 satellite, we have also been able to tune in some Australian TV channels. It fits straight in to a Sky Dish system. So give us a call.
